ABOUT ME

Full-stack engineer with proven expertise in building scalable, real-time systems using React and Node.js. B.Tech Computer Science student with 9.1 CGPA. SIH semifinalist and accomplished national hackathon participant. Actively engaged with emerging AI technologies through IBM's Agentic AI program and Google's generative AI workshops. Committed to writing efficient, maintainable code and solving complex architectural problems.

EDUCATION

Guru Gobind Singh Indraprastha University

Bachelor of Technology (B.Tech) in Computer Science Engineering
CGPA: 9.1/10

Delhi, India

Expected May 2027

TECHNICAL SKILLS

Languages: Java, C++, JavaScript, Python

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Socket.io, JWT Authentication

Tools & Platforms: Git, GitHub, Docker, Postman, Linux, Vercel, Cloudinary

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks

PROJECTS

Meridian – Collaborative Interview Platform

React, Node.js,

Express.js, Socket.io, MongoDB Engineered a real-time collaborative coding platform supporting synchronized code editing, live code sharing, and secure code execution sandbox integration using Socket.io, Monaco Editor, and modern web technologies. **Live Demo:** <https://meridian-test-zwwm.vercel.app/dashboard>

Realtime Multiplayer Drawing Game

React, Node.js, Socket.io, MongoDB

Implemented a realtime multiplayer drawing game inspired by Scribble.io featuring synchronized canvas interactions, game rooms, live chat, and low-latency communication using WebSockets and Canvas API.

Video Streaming Backend System

Node.js, Express.js, MongoDB, Cloudinary

Architected a scalable backend system for a video-sharing platform featuring JWT-based authentication, media uploads, playlists, subscriptions, comments, and likes. Integrated Cloudinary for efficient cloud-based media storage and management.

GitHub: github.com/Anish-develops/Project_Based_Backend

MoonSafe – Women Safety Application

React Native, n8n

Developed a women safety application enabling SOS alerts, live location sharing, emergency contact notifications, and AI-triggered automation workflows for rapid emergency response and safety monitoring.

ACHIEVEMENTS & LEADERSHIP

- Built an AI-powered Resume Builder during IBM's Agentic AI: From Learner to Builder program using intelligent automation and AI-agent architecture concepts.
- Completed Google AI workshops and gained hands-on exposure to Generative AI, prompt engineering, and modern AI tooling concepts.

EXTRA-CURRICULAR ACTIVITIES

- Customized and maintained a portable Arch Linux setup with Hyprland configuration and personalized workflows.
- Skilled in digital design and image editing using Adobe Photoshop.
